

A box plot comparing the number of eggs per female for two species. The y-axis represents the number of eggs, ranging from 0 to 100. The x-axis has two categories: 'female' and 'male'. The 'female' group is represented by a pink box, and the 'male' group is represented by a blue box. Individual data points are overlaid on the box plots. The 'female' group shows a median around 10, with most data points between 0 and 20, and a few outliers up to 40. The 'male' group shows a median around 10, with most data points between 0 and 20, and a few outliers up to 40.
